Ms. Ruth G. Fullen
Environmental Engineer
Solar Turbines, Incorporated
P.O. Box 85376
San Diego, CA 92138-5376

Dear Ms. Fullen:

PART B APPLICATION REVIEW: SOLAR TURBINES, INCORPORATED, HARBOR DRIVE FACILITY, SAN DIEGO, CALIFORNIA (EPA ID NO: CAD008314908)

The Department is processing your hazardous waste facility application at the present time. The subject application is dated January 15, 1987.

Based on previous initial reviews, we have found applications deficient in meeting the required standards. It is also our experience that when we issue notice of deficiencies, we receive incomplete responses due to the complicated nature of hazardous waste control regulations.

To facilitate information transfer and provide adequate upfront guidance, we have scheduled a one-day Part B Application seminar on October 19, 1990, at 9:30 a.m. at the State Building's auditorium (first floor) located at 245 W. Broadway, Long Beach, California. We are inviting you and your consultants to attend the seminar. During this seminar, we will discuss the process, procedures and technical standards which must be met to achieve a complete application. Consequently, we will discuss our expectations, project time lines, roles and responsibilities, and consequences of an incomplete application.

We have put together an extensive Permit Applicant's Guidance Package for Storage and Treatment Facilities, which should be used to develop an acceptable permit application. We have placed a copy of this package at Minuteman Press, 322 Pine Avenue, Long Beach, California 90802, (213) 491-7574 for you to order copies in advance. We strongly recommend that you contact the Minuteman Press by October 12, 1990 to order your copies. The copy center will accept orders until October 16, 1990 and will then print the packages which you may pick up on the day of the seminar. We will use this material during the seminar.

In conclusion, I would like to point out that we are making this effort to provide upfront guidance and education to ensure that complete applications are received by the Department. Failure to provide acceptable applications within the specified time frames can lead to permit denial actions.
